

# Nintendo Switch

By:Jonathan Chambers

# About The Switch

Known in development by its name called Nintendo Switch, it was announced in October 2016 and going out in March 2017. The Nintendo Switch is a hybrid; it's a handheld and a home console. The dock charges it and it has a touch screen. It's also for multiplayer games.

# How it functions

The switch is a wireless joy cons controllers. Which in includes feedback, social media and hulu. The joy cons help you play handheld mode or home mode. It supports online gaming with the internet. The nintendo eshop helps you buy games like mario odyssey, legend of zelda and splatoon .

# The Man Who Made The Nintendo Switch

Fusajiro Yamauchi was the man who made Nintendo. On November 6, 1859, he made a card shop named Nintendo Koppai during the time when the Japanese government was using playing cards. He died in 1940. His son has kept going with Nintendo and he turned it into game systems.

# What I think about this

I think that nintendo had this planned since it was they first made it. After learning all of this i know how long it's take to make games. This show what it's like to be a game designer. This is how nintendo became popular .
